Lehrstuhl für Agrarsystemtechnik

# Influence of temperature and feeding mode on digestion and sanitation efficiency during multiple- stage anaerobic treatment of liquid dairy cattle manure

Mathias Effenberger

Vollständiger Abdruck der  
von der Fakultät Wissenschaftszentrum Weihenstephan für Ernährung,  
Landnutzung und Umwelt der Technischen Universität München  
zur Erlangung des akademischen Grades eines

Doktor-Ingenieurs (Dr.-Ing.)

genehmigten Dissertation.

Vorsitzender:  
Univ.-Prof. Dr. J. Meyer

Prüfer der Dissertation:  
1. Univ.-Prof. Dr. H. Auernhammer, i. R.  
2. Univ.-Prof. Dr. K. J. Hülsbergen  
3. Univ.-Prof. Dr. Dr. h.c. P. A. Wilderer, i. R.

Die Dissertation wurde am 19.09.2007 bei der Technischen Universität  
München eingereicht und durch die Fakultät Wissenschaftszentrum  
Weihenstephan für Ernährung, Landnutzung und Umwelt  
am 11.03.2008 angenommen.

**TABLE OF CONTENTS**

1	INTRODUCTION.....	1
2	STATE OF KNOWLEDGE.....	4
2.1	Environmental Impacts and Health Risks Associated with Livestock Manure .....	4
2.1.1	Hygienic Risks of Land Spreading.....	5
2.1.2	Legislation .....	5
2.2	Treatment of Livestock Manure .....	7
2.2.1	Treatment Options for Sanitation .....	8
2.2.2	Control of Pathogen Reduction .....	9
2.3	Detection and Quantification of Pathogenic and Indicator Microorganisms in Slurries.....	11
2.4	Anaerobic Treatment of Liquid Cattle Manure .....	13
2.4.1	Biochemistry of the Anaerobic Treatment Process .....	13
2.4.2	Anaerobic Digestion Systems for Liquid Cattle Manure .....	17
2.4.3	Sanitation by Anaerobic Digestion.....	19
2.4.4	Digestion Performance of “Advanced” Anaerobic Treatment Processes .....	23
3	THE SCOPE OF THE THESIS .....	27
4	MATERIALS AND METHODS .....	29
4.1	Pilot Biogas Plant .....	29
4.1.1	Experimental Farm .....	29
4.1.2	Collection and Treatment of Liquid Manure.....	29
4.1.3	Collection and Utilization of Biogas .....	31
4.1.4	Process Control and Data Logging.....	32
4.2	Procedures at Pilot-Scale .....	33
4.3	Model-Scale Biogas Plant .....	35
4.3.1	Assembly of Model Plant .....	35
4.3.2	Process Control and Data Logging.....	39
4.4	Procedures at Model-Scale .....	40
4.5	Analytical Procedures.....	42
4.5.1	Dry matter.....	43
4.5.2	Volatile Solids .....	43
4.5.3	Chemical Oxygen Demand.....	43
4.5.4	Parameters Derived from Feed Analyses .....	43
4.5.5	Ammoniac Nitrogen .....	44

## Table of Contents

---

4.5.6	Elemental Analysis .....	45
4.5.7	Volatile Fatty Acids.....	45
4.5.8	pH Value.....	45
4.5.9	Alkalinity.....	45
4.5.10	Electrical Conductivity .....	45
4.5.11	Biogas Production .....	45
4.5.12	Biogas Composition .....	47
4.6	Characteristics of Liquid Dairy Cattle Manure .....	47
4.7	Evaluation of Treatment Performance.....	49
4.8	Determination of The Methane Yield of Digested Manure in Batch-Tests .....	50
4.9	Investigations of Residence Time Distributions and Mixing Conditions in Tubular Horizontal Digesters by a Tracer Method .....	51
4.9.1	Selection of Tracer .....	51
4.9.2	Tracer Injection and Sampling Procedures.....	51
4.9.3	Tracer Determination.....	52
4.9.4	Residence Time Distribution Function Analysis.....	53
4.10	Accompanying Hygienic Investigations.....	54
5	PRESENTATION OF RESULTS .....	56
5.1	Digester Temperatures.....	56
5.2	Loading Rates of the Digesters.....	58
5.3	Anaerobic Digestion Process.....	59
5.3.1	Values of pH and Alkalinity in Digester Samples.....	59
5.3.2	Ammonia Levels .....	60
5.3.3	Total Volatile Fatty Acids .....	61
5.3.4	Individual Volatile Fatty Acids .....	63
5.3.5	Storage of Digest .....	64
5.3.6	Degradation of Organic Matter .....	65
5.3.7	Conversion of Nitrogen .....	66
5.3.8	Biogas Composition .....	67
5.3.9	Biogas Production Rate .....	70
5.3.10	Biogas and Methane Yield from Liquid Manure .....	75
5.3.11	Methane Yield from Digest in Batch-Tests.....	76
5.3.12	Own Energy Consumption of the Pilot Plant .....	76
5.4	Residence Time Distribution in Tubular, Baffled Digester.....	77

## Table of Contents

---

5.5	Sanitation Efficiency .....	80
6	DISCUSSION.....	87
6.1	Performance of the Anaerobic Digestion Process in the Pilot Plant .....	87
6.2	Sanitation Performance .....	93
6.3	Hydraulic Efficiency of Horizontal Tubular Digester.....	96
6.4	Energy Efficiency of the Pilot Biogas Plant.....	98
6.5	Comparison between Pilot and Model Scales .....	99
6.6	Scenario for a Real-Case Application .....	100
7	CONCLUSIONS AND OUTLOOK .....	101
8	ABSTRACT .....	104
9	ZUSAMMENFASSUNG .....	106
	REFERENCES .....	109
	APPENDICES.....	119
