The devastating earthquake in Turkey and Syria took the lives of thousands of people. Others have been seriously injured or suddenly become homeless. We can only imagine how people in the region are currently suffering from this situation. Our thoughts are with the numerous students from Turkey and Syria here at the TUM as well as with their family members and friends.

We are united by the hope that we will at least be able to mitigate the terrible consequences of this natural disaster. If our affected students and employees need psychological advice, you can find contact persons at TUM here <https://lnkd.in/eUYpMY4J> and here https://lnkd.in/e_Ttk552.

I want to motivate our community members to alleviate the suffering of the people in the earthquake area with donations, for example, centrally through the alliance of German aid organizations "Aktion Deutschland Hilft" (<https://lnkd.in/e89uxyJv>).
