

Journal publishing with TUM.University Press

Our offer

- Hosting of the **OJS publishing software** which operates the complete editing process
- Journal **basic set-up**
- **Article templates**, checklists and support material for journal publishing
- **Consulting** on editorial processes
- **Support** in increasing **visibility** and discoverability of your research results
- **Training sessions** for the OJS publishing software and other aspects of publishing

Your benefits

- **Sustainable access** to your research results through Diamond Open Access
- **Increased reusability** of data with Creative Commons licenses
- High **scientific quality** ensured through transparent quality assurance processes (e. g. editorial board, peer review) and support in their set-up
- A **publishing service** that supports you in implementing the **FAIR data principles** (see DFG [Guidelines](#) for Safeguarding Good Research Practice)
- Very high **retrievability** of your research results by feeding them into relevant journal directories (e. g. Electronic Journals Library EZB, Union Catalogue of Serials ZDB, DOAJ)
- Corresponds to the **quality standards of open scientific communication** and can be certified (DINI certification for open access publication services recognized by the DFG)
- Contributes to TUM's efforts to provide **free access** to **scientific information** through Diamond Open Access
- Continuous and **professional support** of your journal project by TUM.University Press

You can find a detailed outline of our services [here](#).
