

AI in Manufacturing Industry – Consulting Project

Detecon is the consulting entity of **Deutsche Telekom** and is now building an AI Assessment (AI Readiness Index) for manufacturing companies. The Assessment primarily focuses on the necessary data to empower companies to utilize various types of AI, as well as the ethical and risk-related aspects that become increasingly significant with the implementation of AI. The Project is carried out with the International Center for Industrial Transformation (INCIT) and will have several pilot assessments with large players in Manufacturing (Rev >10 Billion €).

About the Project Study

- Starting Date **01.03.2025**
- 3 Months Full-Time (can be changed depending on the project and participant requirements)
- Tasks:
 1. Introduction Guide for AI in Manufacturing
 2. Development of Assessor Trainings
 3. Case Study Development

Our Offering

- Close collaboration with Consultants, Managers and Partners
- High learning curve and interesting insights from the fields of consulting, manufacturing and technology management
- Insights into the current state of AI in the manufacturing industry
