The San Antonio Breast Cancer Symposium (SABCS), the 28th taking place December 8th-11th 2005 again in San Antonio, TX, USA, has become over the years a leading and essential scientific meeting for state-of-the-art breast cancer diagnostics and therapy. In the following selected presentations on new developments and latest aspects in nanotechnology, proteomics, pathology, diagnostics and detection as well as in operative techniques including sentinel lymph node biopsy are described, evaluated and summarized.
