The Guidelines for Quality Provision in Cross-border Higher Education were developed and adopted to support and encourage international cooperation and enhance the understanding of the importance of quality provision in cross-border higher education. The purposes of the Guidelines are to protect students and other stakeholders from low-quality provision and disreputable providers (that is, degree and accreditation mills) as well as to encourage the development of quality cross-border higher education that meets human, social, economic and cultural needs. Based on a survey about the main recommendations of the Guidelines, this report monitors the extent to which OECD countries and a few non-member partners complied with its recommendations in 2011. Twenty-three responses were obtained from 22 Members.
